Question	Answer
1. Board Name	Ohio EPA, Division of Materials Waste Management
2. Point of Contact	Joe Goicochea
3. Describe the board's primary purpose, goals and objectives, and licenses issued.	These regulations require construction and demolition debris (“C&DD”) facilities to have at least one certified operator that is on site or reasonably available each day during operations. The operator is responsible for overseeing all operations, being thoroughly familiar with proper operating procedures, the terms and conditions of the license, and the rules. They review and sign the completed daily log for each day of operation.
4. Describe the board’s annual workload. How many staff are employed?	The Division of Materials and Waste Management administers the state’s solid waste, infectious waste, and C&DD programs. Less than 1 FTE supports this operator certification program.
5. How many new licenses does the board issue annually? How many renewed licenses are issued annually? How much does a new license cost? How much does a renewal cost?	Approximately 60 new licenses annually, and approximately 60 renewed licenses annually. No fee.
6. In the past 5 years, has there been any consideration to lower the licensure cost?	No fee.
7. How much revenue is procured from the licensure fees? What does this revenue fund?	No revenue.
8. Are there any federal regulations, or regulations required to be met outside of the existing licensure requirements that have to be complied with? Does federal law require the board to be renewed in some form?	No.
9. Does the board issue an examination prior to licensure? Does the board issue continuing education courses? If so, how often is continuing education necessary? If the examination or continuing education requirements are done outside the board then what determines the selection of an outside organization to host it?	No exam. 10 training hours consisting of at least two hours of C&DD rules/laws and at least six hours of best management practices for C&DD facilities. A three-member panel comprised of industry, health districts, and agency representatives approves continuing education.
10. How many other states regulate the occupation or occupations under the board's	N/A

jurisdiction? Is a license required to engage in that occupation or those occupations in other states?	
11. Has the operation of the board inhibited economic growth, reduced efficiency, or increased the cost of government?	No.
12. Are there any licenses that are no longer issued by the board?	No.
13. Is there anything that the board would like to see changed or implemented in regards to occupational licensing within the scope of this legislative review?	No.
14. Has the board recommended statutory changes to the general assembly that would benefit the public as opposed to the persons regulated by the board, if any, and have those recommendations and other policies been adopted and implemented?	No.
15. Is the preservation of the board and the board's licenses necessary to protect the public's health, safety, or welfare?	The agency works closely with industry to deliver an operator certification program that is accessible and not burdensome, and promotes compliance with laws and regulations protective of human health, safety, and the environment.
16. Could the public be protected or served in an alternate or less restrictive manner? If applicable, please identify any licenses or functions of the board that could be eliminated or consolidated.	The agency works closely with industry to deliver an operator certification program that is accessible and not burdensome, and promotes compliance with laws and regulations protective of human health, safety, and the environment.
17. Any additional notes or comments the board believes the committee should be aware of?	The agency works closely with industry and health districts to deliver this operator certification program.
