Chairman Huffman, Vice Chairman Johnson, Ranking Member Liston, and members of the Senate Health Committee, thank you for allowing me to provide written testimony on House Bill 96, Ohio's biennial operating budget. My name is Chuck DeJonckheere, and I am with Hamilton County Public Health, where I serve as director over our lead poisoning prevention program. I offer testimony on changes passed by the Ohio House to the budget which should concern all of us. The Ohio House eliminated the \$1MM/year Lead Safe Home Fund and stripped the Lead Abatement Fund of meaningful financial support from \$7MM/year to \$250K/year.

Ohio's Lead Poisoning Prevention Programs play a vital role in protecting children and families from the dangers of lead exposure—primarily caused by lead dust from paint in homes built before 1978. The programs are built on a proactive, prevention-first model, with cornerstone initiatives including the Lead Abatement Fund, the Lead Safe Home Fund, and the State Children's Health Insurance Program (SCHIP) Lead Program.

There is no safe level of lead in the blood, any lead in the body causes harm. In 2024 alone, more than 5,500 Ohio children were diagnosed with elevated blood lead levels. Cutting these critical funding streams would significantly weaken Ohio's ability to prevent lead poisoning before it occurs.

Beyond protecting children's health, these state dollars unlock additional federal funding. HUD's Lead Hazard Reduction Grants require at least a 10% local match—funds from Ohio's program help meet this requirement. This leveraging effect multiplies the impact of every state dollar. For the 2024 grant cycle alone, over \$27MM of federal lead dollars were secured.

Equally important is the quality of the abatement work itself. State funding allows for more permanent and effective lead hazard controls, such as full component removal and replacement, rather than short-term fixes like repainting or stabilization. These durable solutions protect not just the current occupant, but multiple generations of children who will live in these homes.

Restoring funding to Ohio's Lead Poisoning Prevention Program is not just a matter of public health—it's a commitment to the future of our children and communities. It ensures we can prevent lead poisoning before it happens, leverage federal dollars effectively, and invest in permanent, high-quality solutions. The cost of inaction is too high. Let us continue the progress we've made—and not retreat from our responsibility to protect Ohio's families. Please restore the funding for the Lead Abatement Fund, the Lead Safe Home Fund, and preserve the State Children's Health Insurance Program.

Once again, Chairman Huffman and members of the Committee, thank you for the opportunity to provide testimony today on HB 96.
