

Alexander Satava
Testimony on Ohio Senate Bill 1
February 10th, 2025

To Education Committee Chair Kristina Roegner and the Ohio State House,

My name is Alex Satava and I appreciate the opportunity to testify my written words here today. As a student I passionately oppose S.B 1.

My path as a student has not been the typical trail people follow. Only through extraordinary people on campus and otherwise, have I continued to achieve new feats with each semester. This bill has been a source of headaches to those professors on campus that have done so much. Beyond that, as a student, I want legislation that improves schools, not brain drain and the potential dangers of S.B 1.

I hope you consider this testimony and vote no on this counterproductive bill. Once again thank you for the opportunity for my testimony to be heard.
