

I am writing to repeal the unreasonable and community devastating law that requires a Highway Interchange to be built in the middle of a highly residential community. This repeal language already passed the Ohio Senate in a vote of 30-1, and then somehow was chosen not to be taken care of at the end of the year. I am a Pastor, a Doctor, a Chaplain, a retired Green Beret. This has been my home for 51 years. Expensive studies have already shown there would be no change in traffic. This is about rich men destroying homes so their money making industrial Parkway will have an easier access. Please help us and represent us.

Thank You. Buck & Aulif
