

**As Reported by the House Technology and Innovation Committee**

**136th General Assembly**

**Regular Session**

**2025-2026**

**Am. H. B. No. 392**

**Representatives Fischer, Demetriou**

**Cosponsor: Representative Mathews, T.**

---

To enact section 9.89 of the Revised Code to limit  
further regulation of certain computational  
systems, require risk management policies for  
AI-controlled critical infrastructure, and to  
name this act the Ohio Right to Compute Act.

**BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF OHIO:**

**Section 1.** That section 9.89 of the Revised Code be  
enacted to read as follows:

**Sec. 9.89.** (A) As used in this section:

(1) "Compelling governmental interest" means a  
governmental interest of the highest order in protecting the  
public that cannot be achieved without burdening the lawful use  
of computational resources, including all of the following:

(a) Ensuring the continued and reliable operation of  
critical infrastructure facilities;

(b) Addressing deceptive practices and fraud;

(c) Protecting minors and vulnerable populations from  
harmful content generated by artificial intelligence systems,  
such as images or video or audio recordings that replicate the

<u>likeness of an individual, commonly known as "deepfakes," that</u>	19
<u>are generated or published without the individual's consent;</u>	20
<u>(d) Remediating public nuisances associated with</u>	21
<u>computational resource infrastructure;</u>	22
<u>(e) Governing acceptable uses of artificial intelligence</u>	23
<u>systems by employees of the political subdivision or state</u>	24
<u>agency.</u>	25
<u>(2) "Computational resource" means any system, software,</u>	26
<u>network, device, or infrastructure capable of processing,</u>	27
<u>storing, transmitting, manipulating, or disseminating data or</u>	28
<u>information, including hardware, software, algorithms,</u>	29
<u>cryptography, artificial intelligence systems, machine learning</u>	30
<u>systems, quantum computing tools, and any similar technologies.</u>	31
<u>(3) "Artificial intelligence system" means any system that</u>	32
<u>utilizes machine learning or similar technologies to infer from</u>	33
<u>inputs how to produce outputs that affect or influence physical</u>	34
<u>or virtual environments, including content generation,</u>	35
<u>decisions, recommendations, or predictions.</u>	36
<u>(4) "Critical infrastructure facility" has the same</u>	37
<u>meaning as in section 2911.21 of the Revised Code.</u>	38
<u>(5) "State agency" means every organized body, office, or</u>	39
<u>agency established by the laws of the state for the exercise of</u>	40
<u>any function of state government. "State agency" does not</u>	41
<u>include the general assembly.</u>	42
<u>(6) "Political subdivision" means any body corporate and</u>	43
<u>politic that is responsible for governmental activities only in</u>	44
<u>a geographic area smaller than the state.</u>	45
<u>(B) No political subdivision or state agency shall enact,</u>	46

adopted, enforce, or maintain any law, rule, regulation, permit 47  
requirement, or other administrative practice that restricts or 48  
prohibits any person's lawful use, development, deployment, or 49  
possession of a computational resource unless the restriction is 50  
narrowly tailored to achieve a compelling governmental interest. 51

(C) (1) Any person or other entity that implements or 52  
operates an artificial intelligence system that in whole or in 53  
part controls a critical infrastructure facility shall, before 54  
or within a reasonable period after the deployment of the 55  
system, implement a risk management policy that conforms to all 56  
applicable federal regulations and either of the following: 57

(a) The latest version of the artificial intelligence risk 58  
management framework developed by the national institute of 59  
standards and technology under the United States department of 60  
commerce; 61

(b) The international organization for standardization and 62  
international electrotechnical commission 4200 standard or any 63  
other nationally or internationally recognized artificial 64  
intelligence risk management standard or framework not referred 65  
to in this section. 66

(2) The requirement to implement a risk management policy 67  
under division (C) (1) of this section does not apply if the 68  
artificial intelligence system is capable of completing only 69  
nonexecutive tasks of a procedural or preparatory nature or 70  
implementing only those decisions previously made by a human 71  
decision maker, or if the artificial intelligence system is 72  
exclusively an antivirus, antimalware, or cybersecurity tool. 73

(D) This section shall not be construed to abridge, alter, 74  
diminish, or conflict with any legal rights and remedies related 75

<u>to intellectual property, including patent, trademark,</u>	76
<u>copyright, and trade secret protections.</u>	77
<b>Section 2.</b> This act shall be known as the Ohio Right to	78
Compute Act.	79
