

Please vote against this bill. Why do we have a public health department if we won't listen to them? Would you react differently if the disease was polio or Ebola? As a doctor seeing covid every day, I am beyond frustrated with the lack of common sense and even basic courtesy in the general population. We have laws about seatbelts, and smoking, and wearing clothing in public.

"Don't tread on me?" Give me a break. Don't breathe on me. Wear a mask or stay the heck out of my airspace.
