

5/27/2020

State Senator Kristina Roegner,

I am a Board Certified Naturopath and Board Certified Holistic Health Practitioner. I cannot possibly stress enough how critical it is to curb the power of the director of health for Ohio and to pass SB 311. I understand the need for checks and balances but we have no balances with this current Ohio Revised Code written in 1908 giving an unelected bureaucrat the power over 11.7 million Ohioans. Ohioans need to be protected at all costs and never be faced with these draconian measures and overreach of power ever again.

Medical malpractice occurs when a hospital, doctor or other health care professional, through a negligent act or omission, causes an injury to a patient. The negligence might be the result of errors in diagnosis, treatment, aftercare or health management.

Dr. Amy Acton is certainly responsible for the negligent care of Ohioans especially the care of Ohioans in nursing homes. 79% of covid deaths are in nursing homes, not the general population. Dr. Acton has failed the elderly demographic and forced quarantine on healthy individuals. There is zero empirical data that asymptomatic people spread the virus. As well, all covid deaths have had comorbidities and underlying health issues!

The Director of Health now and in the future needs limited power and to be overseen by JCARR. It's the Director of Health who needs to be feared!!

We fought a revolution during a smallpox epidemic. Our unalienable rights, our constitutional rights and medical autonomy are not void during any pandemic.

I implore you to vote yes on SB311.
