

November 16, 2020

I am a registered nurse in the State of Ohio. I have been a telephone nurse case manager for greater than 20 years with licensure currently in CA, FL, NJ, NY, NC, and PA. I am currently in need of obtaining more licensure because for my job I do telephonic nurse case management in many states that require a license in their state. Currently my employer is being gracious and paying for licensure in the current states I have. They have, however, drafted a new policy that a nursing compact licensure is required to be hired. I am grandfathered. This is becoming a common requirement as employers are not wanting to have to pay for multiple licenses, therefore, only hiring nurses with a compact license.

In order to find jobs in telephonic nurse case management Ohio nurses need to have a compact license and I hope this can be put in place as soon as possible.

Sincerely,

Anita Lynette Calvin
