

Erica Daniels Proponent Testimony for H.B. 60 – 3/22/21

I am the mother of a 15 year old with severe autism who has been using medical cannabis successfully in PA for 4 years. There is a body of research to support this in addition to empirical data and testimony of thousands of parents and self-advocates. Without medical cannabis my son would e in a institution right now. I will provide video and data at the hearing.
