

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Jane Marie DeGreef and I am a Proud 1st Generation American and even Prouder Air Force 100% Service-Connected Disabled Total and Permanent Disabled Veteran which I was "awarded" at the age of 37 and the reason I support House Bill 248 is because First I am an American and this is a FREE Country and I fought and sadly my husband at the age of 29 paid the ultimate price with his life for this country for my freedoms. Second have you heard of Gulf War Syndrome it is the new Agent Orange and one of the Causes is Vaccines on ONE deployment I was given 13, yes that is 13 vaccines and sent overseas to fight and defend this country only to come home to a broken system and a government who sadly has turned their back on another generation of Veterans. As today 22 Veteran yesterday took their lives, today 22 more Veterans will end their lives and tomorrow another 22 Veterans will sadly commit Suicide yet we have NEVER heard a word about this Pandemic while 8,030 Veterans die because our Government sends us to war and when we come home they forget about us. I was forced to take all those vaccine. I fight everyday with pain and have endured 50 surgeries ONLY 2 has the Department of Veterans Affairs paid for. Because as they say The VA a second chance to die for your country since 1930. This is my body and it is my choice to put in it what I want. If the vaccine is great than those who take it will be safe and protected so I do not need it. My body my choice isn't that what they all say when they want to kill a baby. I don't want to kill a baby I want to take care of me.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely and  
God Bless America Land that I Love,  
Jane Marie DeGreef
