

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Meghan Fry and I am a nanny working for those employed in the medical field at this time. The reasons I support House Bill 248 are the following (summarily). First, I have family who cannot take needles of any kind and have any variety of very negative reactions; their conditions deserve to be taken into account. Not to suggest that this is any of your business, due ADA and HIPAA and the 5th Amendment of the US Constitution, but no one has any right to overwrite other people's conditions and violate our human rights. The USA cosigned the Nuremberg Code in 1947, and this international code is binding on the conduct within this country relative to medical practice. Thus far, among the ways in which it has been violated... More people have died from the supposed "vaccines" than from the virus (VAERS is also underreported/underreporting due to how more and more people don't have confidence in the competence of

leadership in any organization or governmental body, real or perceived). The matter of vaccines has become a coercive project of between missives ranging from religious leaders to Presidential tweets to mainstream media bombardment. The development/production of this vaccine, employing the use of tissues taken from a murdered human baby, many in fact, is also egregiously morally reprehensible. The full disclosure of the ingredients within the vaccine itself is not accounted for to the public. So it goes perhaps without needing to be said that, even without any preexisting conditions making an injection not feasible medical treatment, to mandate vaccines or to require a violation of privacy in any circumstance concerning medical history would also violate the human and conscience rights of millions of human persons, including Ohioans. I support House Bill 248 because I am an American – not a Nazi/National Socialist – and I shudder to think just how much worse and consequential this already-present and operational tyrannical power-play will be in the future for all human life, families and society at large if this pretense of fraudulent virtue is

presently so permitted/enabled and emboldened from other persons to gaslight and try to bully more people into compliance. People can lie and deceive themselves and everyone's second cousin all they like, but reality will never be redefined and will always reassert itself in an immutable way regardless of the pretense and presumption of fools. A violation of human rights will always be a violation of human rights, and abuse – be it sexual, physical, verbal, emotional, spiritual, moral, financial, social, medical – will always be abuse. You representatives can either uphold the standard of justice which has already been established, or you will be responsible for its collapse and share in the guilt of all the rippling criminal enterprises to come. I know you are human. You have people you care about too. So I hope you understand the gravity of the situation and acknowledge and so treat it accordingly. “It is for freedom that Christ set us free, so do not submit again to the yoke of slavery.” (Galatians 5:1) And I will say, in case it has been forgotten, that there is no happier a man to walk this earth, even if in times of tribulation, than one whose

*conscience is clean, and whose soul is
kept unstained by the spirit of this World.*

*Thank you once again for this
opportunity to provide testimony on the
need for and urgency of House Bill 248.*

Sincerely, Meghan Fry
