

My name is Elena Marcano and I am a teacher, and the reason I support House Bill 248 is because I believe in the personal freedom. I am more concerned about the vaccine than the virus itself. We do not know the potential long term side effects and I believe the entire process has been rushed. If some people want to get a jab, it is their choice, but forcing the vaccine would violate the Nuremberg Code. The voluntary consent is essential and people should not be coerced or discriminated if they choose not to get a vaccine.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Elena Marcano
