

My name is Steve Fitch and I have lived in Wellington OH since 2005. Co-Vid 19 has caused a lot of changes and problems for our country, state, and localities, not to mention personal changes. I was encouraged to retired at age 63 from United Airlines after a 35 year career as a mechanic/ inspector. My wife lost her job in November of 2019. During my career I was exposed to many viruses as an mechanic and inspector. The cabin of the aircraft had thousands of people a day through them and several major epidemics during my time (Swine flu, SARS, MERS, N1H1, Ebola). We used common sense to protect ourselves, ie handwashing and using gloves. I never got sick from one of those viruses. We didn't lock down , mask people, etc etc. we have over reacted to over inflated death numbers and faulty test results. To require a vaccine for a virus that is 99.7 % survivable and higher than that if the correct therapeutics are used.

The vaccines they want you to take aren't really vaccines they are experimental gene therapy. I choose not to be a lab rat! To require a passport to go shopping or church or even worse the go to work would be reminiscent of Nazi Germany.

I have a God given immune system and trust will listen to Him and not Fauci or Biden or Gates or DeWine. Please vote for H.B. 248. And vote for freedom and liberty.
