

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

Being a Director of a clinic, and a nurse in Environmental Medicine, I'm seeing clients who have been affected by the loss of their informed medical consent, having received 'vaccinations' they did not get full information on the risks or other potential side effects. They now are dealing with health issues, and co-morbidities subsequent to receiving it. Many felt they had to receive it to keep their job, continue in college, or attend school or go to certain venues-essentially to continue living a full life. The CDC, NIH, VAERS, physicians, have done the hard work of peer-reviewed research worldwide documenting statistically that vaccines, are creating more side effects and sometimes deaths than the actual illness. Statistically, the risk factors for some illnesses are less than post-vaccination. The case of Cov-19 shows there is no excess deaths worldwide from this, the CDC has admitted in August of 2020 that the deaths they were reporting for COV-19 were only 6% of the total they had published-the rest were pre-existing conditions people had died from. To demand a person subject themselves to an experimental agent, untested and unauthorized by the FDA without full consent and choice is a breach of their freedoms and also against the Nuremberg Code. The FDA and many scientists worldwide have made it clear that due diligence has not been done regarding appropriate long-term trials on the covid injections that are not traditional vaccines.

I ask that you strengthen our country's democracy and our democratic rights, allowing people to freely choose for their lives, not forced to receive what they are not fully informed about, what is known not to prevent transmission nor infection, and an agent that its now shown to have serious health risks or even death. Thomas Jefferson founded our country on the principal that an educated populace can make choices for themselves, not be treated as a monarchy treated those who formed our country.

Thank you.

Sincerely,

Sharron Coeurvie
