

My name is Victor Von Doom, husband and father of 12. I am a business owner with a background in science and engineering. I speak for my family as a whole and I support House Bill 248 because I/we do not consent to coercive/forced vaccinations in any way. I have two offspring that were what we now call "vaccine injured". One of those children is currently still dealing with life debilitating seizures. I request that HB248 the Vaccine Choice and Anti-Discrimination Act be authorized for the sake of all people, who are conscious free moral agents. Our body our choice.
