Re: HB 248

Dear Chairman Lipps, Vice Chair Holmes, Ranking Member Russo and Members of the House Health Committee:

I am writing this letter today to express my full support for HB248. Quite honestly, I am rather sad that it has even come to a point in my lifetime wherein a bill such as this one needed to be drawn up in the United States of America. This last year has brought to my attention all of the bills/issues I have personally allowed to escape my attention due only to my own neglect. What a difference a year makes; won't make that mistake again!

Regarding mandatory vaccines, status disclosures, registry, passport system, etc. (in particular with a shot that isn't even approved by the FDA except for Emergency Use Only, but also one that is causing great harm to people receiving it), I absolutely do not feel that our government nor any business, etc. should be allowed such control over us individually. When people receive any other vaccination, typically that would mean they are protected. Why then, is the "protected person" with regard to this Covid shot, so worried about the "unprotected person"? Isn't that the worry of the "unprotected person"? It just doesn't make sense!

I have already witnessed numerous situations with regard to this Covid "shot" that are troublesome. Not only are the adverse events numerous, but the encounters with people discussing the same are numerous. The first one being that my son's school allowed children whose parents wanted them to be vaccinated, to leave the school during the school day to get the "shot". Immediately that drew attention to who was getting it versus who wasn't. There are discussions among them now with regard to who has it, who should sit near who and whether they should be hanging out together. Ironically, the discussions relate to who wants to be next to a vaccinated person since there are many doctors who are sharing information about the shot itself shedding particles to the unvaccinated and they are potentially exposing all of the children to sterilization issues. This is all because it's an experimental shot that is unknown. Next there are the parents concerned with kids hanging out with those unvaccinated. My question is, "What children wear the 'Scarlet Letter', the vaccinated or unvaccinated?" Why would any representative of the State of Ohio even consider mandating a passport, etc. with an experiment that didn't even pass animal testing on a disease that has over a 96% chance of recovery for the majority of people. If a doctor told me I had cancer and I had a 96% chance of recovery on my own, but perhaps I should still take Chemo, I would look at them like they lost their mind. This is the same thing; in particular since we don't even know what the end result of the shot will be; we know what chemo does.

Now you are considering mandating an experimental shot that no one has any liability for..what?

Secondly, I play on a women's softball league. At the end of the game, both teams typically high five each other to reference good sportsmanship. During my last game, one woman yelled out to everyone "whose vaccinated". Needless to say she wasn't received well. The problems that have been created are numerous. Are we living in Nazi Germany? What type of environment are you trying to create?

Lastly, I am in the staffing business and primarily deal with law firms. I have been receiving a slew of calls from candidates who no longer wish to stay in their current jobs because their employers are either requesting that they take the experimental Covid shot or they submit to weekly testing. I stand to make a great deal of money by people changing jobs, but this is money I truly would rather not make. The discrimination that is taking place within those offices amazes me. What happened to discrimination laws, HIPPA laws, etc.?

I have immunized my children with all of the vaccines I was told to in the past. I did this so they were protected. I never once would have even considered asking a parent or a child if he/she was vaccinated. I protected my children and felt it was someone else's choice as to what they wanted to do with their children. Why has this changed? We live in America, have you forgotten?

Now as details come out with respect to this Covid virus and the discrepancies in the data and the fact that hospitals received more money to label deaths as "Covid", there is something definitely wrong. I think it's time we put HB248 in place to eliminate someone trying to put through passports, etc. and to settle the waters as they say. How can you mandate the unknown? I personally believe all Covid shot should be stopped until data is reviewed. The adverse events are alarming and the media is suppressing the information. The mere fact that the Governor of our Great State would start a "Vax a Million" is appalling.

MY VOTE IS TO PASS THE H.B.248 AND ALLOW INDIVIDUALS THE RIGHT TO DIRECT THEIR OWN HEALTH CARE DECISIONS FOR THEMSELVES AND THEIR MINOR CHILDREN, FREE FROM COERCION OR PENALTY AND THAT NO PERSON, ENTITY, PUBLIC OFFICIAL, EMPLOYER, ETC. SHALL HAVE SUCH RIGHT TO INTERFERE WITH THAT DECISION. I ALSO BELIEVE THE COVID SHOTS SHOULD BE STOPPED UNTIL FURTHER TRUE DATA REGARDING ADVERSE REACTIONS IS FULLY DISCLOSED.

Respectfully submitted,

Elaine Campbell
