

May 24, 2021

Chairman Lipps, Vice Chair Holmes, and Ranking Member Russo:

Thank you for the opportunity to provide proponent testimony for HB 248. As a practicing Board Certified Doctor of Naturopathy for over 10 years, I will not stay silent. **Health is not and will not ever be injected.**

As a proud, freedom loving American I have deep sadness and betrayal that overcomes me as I write this testimony, though I'm not surprised I have to write this type of testimony after the last 14 months in Ohio. **I will uphold our constitutions and freedoms at all costs because this is our duty as Americans.** The federal, state and local government working with private sectors even considering infringing in our personal lives and private, confidential choices when it comes to vaccinations is absolutely unacceptable. This is wreck less, intolerable behavior that no freedom loving American should be okay with.

Both the federal, state and local government and private sectors have absolutely no business meddling in our healthcare and perverting the law. Nowhere in these documents does it tell me to ever answer to any private businesses or the federal, state and local government for my freedoms and my free choices. Let's face it, there will always be some type of crisis, pandemic or emergency in our lifetimes. Covid-19 is not and will not be an open invitation for the government and the private sector to stick their tentacles into our personal lives no matter what crisis we are facing.

Let's also talk about how divisive this is, especially in populations that cannot be vaccinated for underlying health reasons. You don't force people to go against their DNA. There are specific individuals who are genetically predisposed and cannot be vaccinated. Most have found this out after being **VACCINE INJURED** from a previous vaccination. **Vaccination injury is real and it must not be dismissed.** Talk about creating more unfairness and inequality in an already unequal society!!!! What message does this send to people that fall under genetic predispositions forcing them to inject gene therapies into their already vulnerable

bodies? The Governor may think it's ok to gamble with people's lives but I most certainly do not.

If people choose to be vaccinated without coercion that is their right and I totally support, and respect their rights to choose. **The problem I have is, IF VACCINATIONS WORK, anyone vaccinated should not be threatened by anyone who is not**, especially when it comes to an experimental gene therapy only approved for emergency authorization with zero long term studies that has killed just this year (2021) over 4,000 people and counting according to VAERS. Are we or are we not supposed to be saving lives?

I'd like to leave you with just a few of the many indisputable facts about the track record of Johnson & Johnson and Janssen who have made and distributed drugs and vaccines for a very long time in the United States. I guess it's not enough to know that they poisoned the world with asbestos so why not let them create a vaccine that has now been paused multiple times!! Both have paid large fines to state and federal governments. Since 2000, J&J and its subsidiaries have been charged 55 times with criminal and civil crimes paying a total of \$4,247,381 in fines <https://violationtracker.goodjobsfirst.org/parent/johnson-and-johnson>

There is substantial uncertainty about the benefit of providing AstraZeneca COVID-19 vaccines to adults under 55 given the potential blood clotting risks; blood clots are now potentially as high as one in 100,000—much higher than the one-in-a-million risk believed before.

Nothing like giving **deceitful criminals** contracts to speed up delivery of an experimental gene therapy free of liability all while they make billions of dollars. **Don't you dare think that the other vaccine makers have not been charged and paid out millions because they have, and its public information. They are guilty of even paying off public servants to avoid sanctions.**

It absolutely is a violation of our unalienable rights for the federal, state and local government and the private sectors to impose upon us the requirement that we show proof of vaccinations to just simply be able to participate in normal society!!!! Not only are vaccinations a personal choice, they are a FREE choice left for the individuals only to decide. **Have enough vaccinations for all who want it without coercion and refuse to force it on all who do not.**

I'd like to thank all of the Sponsors and Cosponsors who worked hard on HB 248.

**My vessel belongs to me. This is my body and no one will coerce me in to doing anything that goes against my personal beliefs nor my God given rights.**

HB 248 is about Ohioan's freedoms. I pray you uphold our free choices, forbid this not only with the federal, state and local government, but make sure this is forbidden in the private sectors as well. Please ensure human liberty will not cease to exist by voting yes on HB 248.

It's been a long 14 days, hasn't it?

Respectfully,

Jennifer Eileen, BCND, BCTN, BCHHP
