

*Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.*

*My name is Erica Fill and I am a stay at home, homeschooling mom and the reason I support House Bill 248 is, no one should be able to tell someone else what to do with their body. Our bodies and immune systems are given to us by God. His design for our body is perfect - the way every bit works together is not by chance, but by His design. It is our God given right and responsibility to take care of that which God has given us.*

*Forcing people to take a poison they do not want in order to simply live and take care of their family is morally despicable. My family does not want to be part of this, or any other, government experiment. My fear regarding forcing people to take this experiment - what happens to future generations? Will they be able to have kids? Will those kids be compromised from conception, if conception is even able to occur? Will people be able to fight off other illnesses once their immune systems have been destroyed? How many people are we going to lose once the cold and flu season starts back up because they no longer have the immune system to fight off a basic illness? Allowing this jab to be given out before years of testing has been completed is irresponsible and detrimental to the health and wellbeing of Ohians.*

*No one should have to choose between poisoning themselves with something that will destroy their immune system and caring for their family. Making people choose jab or job is WRONG. This is not communist China. This is Ohio.*

*We live in the USA - land of the free. Let's keep it that way. Please pass House Bill 248.*

*Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.*

*Sincerely,*

*Erica Fill*
