

Rep. Lipps/ Abby Chumley,

I am writing my testimony as a proponent of HB248 – Vaccine Choice Anti-Discrimination Act.

As a United States citizen and a lifelong Ohioan, I am exercising my right to free speech regarding the issues covered in HB 248. As a small business owner surviving the governmental tyranny unleashed on all of the citizens of this state and this country, I am opposing the mandatory masks and vaccine agenda that the current Gov. DeWine is allowing. The physical, mental, and emotional harm that is being perpetrated on the (legal) citizens in the State of Ohio is inhumane and unconstitutional. Gov. DeWine needs to be held accountable for his egregious crimes against the people in the state of Ohio.

Until the madness that was unleashed on all of humanity in 2020 called COVID and the unprecedented level of psychological fear that has systematically destroyed (and will continue for decades moving forward) many good hard-working Americans and others across the planet; I have been silent in the realm of politics. NO MORE!!! I will NOT be silenced. I am writing to you Gov DeWine and all your minions demanding a cease and desist regarding the blatant disregard of our State constitutional rights and our human rights regarding the push for masking and mandating this injection you call a "vaccine".

It is unconstitutional for any institution to override my free will and my choice as to what I feel is best for my body and my personal health care choices. I am an outpatient mental health therapist and I see the devastation of peoples physical, mental, and emotional health and well-being daily.

We know the truth; we are not buying it. By the power invested in me as a sovereign human being given unalienable rights by the God of all that isI DO NOT CONSENT TO MANDATED MASKING OR VACCINES!!! You serve "we the people". We the people say..... NO!!

So Be It

Cynthia Parish-Gillespie
