

5/23/21

Dear Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

I would like you to consider voting yes on this bill. Our decisions on whether or not to take any injection needs to be a personal choice. I have done much research on this vaccine and have made the decision to opt out at this time. I had a vaccine injury 7 years ago and I have been working very hard to take care of my immune system by eating well, exercising, taking supplements, and I am slowly rebuilding my health back to a normal state. I believe that I am contributing to society by taking good care of myself. I should not be singled out, discriminated against, treated differently than any other person for my decision. I could lose my job if HB248 does not pass. Our privacy is something to be valued and protected. If we don't protect our medical freedoms the ramifications will be devastating for all of us. We all deserve the freedom to choose and be valued for our private decisions for ourselves and our children, not only for this vaccine but for all medical procedures. Thank you for your time.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,  
Suzanne MacAlonan
