

Chairman Lipps, Vice Chair Holmes, Ranking member Russo, and members of the house health committee, I appreciate the opportunity to provide proponent testimony for House Bill 248.

My name is Amanda Dyer and I am a local Hero, at one of the largest hospital employers in the tri-state area, Tri-Health. Well, I used to be a Hero, now I am being referred to as an anti-vaxxer, and an extremist as some of my co-workers conspire and talk about my health care decisions and figure out who will be replacing me when I get fired.

In the Last trimester of my pregnancy, and right before birth, both my husband and I contracted the Corona virus, and with little symptoms, we recovered swiftly. Ever since then, we have been pressured, and propogandized into taking this experimental EUA vaccine. I have worked on the frontlines for over a year during the "pandemic", and have yet to see any pandemic, except that of misinformation and corporate control desires. There have been multiple studies conducted that confirm, the best immunity for the Covid 19 virus, is natural infection, and the bodies natural response (Cleveland Clinic). I'm not saying that individuals shouldn't be vaccinated, I'm saying that it should be their decision to decide their health care decisions, not corporations. The vaccination claimed the life of my husband's employer, and soon he will be unemployed due to it. With Tri-health mandating an experimental vaccine, which science has proven is not necessary for individuals in our situation, we will both soon be unemployed with a 6-month-old baby. The vaccine will have effectively taken both of our jobs.

What these corporations are doing is an atrocity. This is not science, and the CDC is not the end all be all for health information. In fact, given their propensity to change their mind, report invalid numbers, and support known liars, they should not be the baseline for any health recommendations. However, these are the "facts and recommendations" that are being propped up by the media and corporations in order to force compliance among the population. This is a violation on our unalienable rights, and our right to medical freedom, not tyranny. This is why it is important that House Bill 248 be passed, as it is written now, and the power of medical freedom be given back to the people, and we stop this atrocity that is being thrown upon them. We beg that you stand with Ohioans, and their medical freedom, and ban mandatory vaccinations, mask, shutdowns, and any other restriction against our freedoms due to this infodemic.
