

August 20, 2021

Chair P. Scott Lipps and Vice Chair Adam Holmes  
Ohio House Committee on Health  
77 South High Street, 13<sup>th</sup> Floor  
Columbus, OH 43215

Chair P. Scott Lipps, Vice Chair Adam Holmes and Members of the Committee on Health:

Thank you for your time and consideration of HB 248 The Vaccine Choice and Anti-Discrimination Act which would prohibit mandatory vaccination, vaccination status disclosures, and certain other actions regarding vaccines.

I fully support HB 248 in its current form and I strongly urge the committee to fast track the bill and to send it to the house floor for a vote.

Only after being fully informed of the risks and benefits of a medical procedure, should patients have the right of rejecting or accepting a medical procedure. I question if the data released by the Centers for Disease Control and Prevention (CDC) showing adverse reactions is presented to those pressured by their employers to accept the unapproved Covid-19 vaccine.

Data released by the Centers for Disease Control and Prevention (CDC) report between December 14, 2020 and August 6, 2021, a total of 571,831 total adverse events reported to VAERS, including 12,791 American deaths, 51,242 hospitalizations, 70,666 urgent care visits, 95,887 office visits, 1,505 miscarriages, 5,590 heart attacks, 4,461 cases of Bell's Palsy, and 16,044 Americans have been permanently disabled from the experimental covid vaccine<sup>i</sup>.

The fact is the Covid-19 vaccine contains new vaccine technology. Messenger RNA (mRNA) is new technology and this is the first time mRNA has been used in a vaccine<sup>ii</sup>. There have been no long-term studies and no studies on pregnant women (CVS 8/19/2021). In addition, the information is ever changing. The CDC now recommends a 3<sup>rd</sup> vaccine dose for those with a weakened immune system<sup>iii</sup>.

One only needs to research The Thalidomide Scandal, The Tuskegee Experiment, The Contaminated Polio Vaccine Incidents, or the CDCs Hepatitis B Vaccine

experiment on American Gays to say, “I will not be an America lab rat for the CDC or Big Pharma.”

The Thalidomide Scandal resulted in more than 10,000 children being born with severe deformities and thousands of miscarriages. It was used for morning sickness for pregnant women without having been tested on pregnant women<sup>ivv</sup>.

1932-1972 Tuskegee Syphilis Study had allowed hundreds of African-American men with syphilis to go untreated so that scientists could study the effects of the disease. The lack of treatment was intentional and consent was not collected. A class action lawsuit was brought against the United States Public Health Service. In 1974, it settled for 10 million dollars and the government agreed to pay the medical treatments of all surviving participants and infected family members, the last of whom died in 2009<sup>vi</sup>.

During an eight-year span (1955-1963) 98 million Americans were injected with a polio vaccine contaminated with cancer-causing virus called SV40. SV40 is a virus found in some species of monkey. This contamination arose because the vaccines were produced in monkey kidney cell cultures harboring SV40<sup>vii, viii</sup>.

The Cutter Incident was another national immunization disaster. Sadly, Cutter Laboratories process to inactivate the live polio virus proved to be defective resulting in 40,000 cases of polio among children and killing ten<sup>ix</sup>.

Before the CDC Hepatitis B vaccine experiments there were no reported cases of HIV or AIDS in America. The AIDS epidemic was officially declared by CDC in 1981, at the conclusion of the experiment. In 1980, the New England Journal of Medicine published a report in which researchers proclaimed the vaccine “safe and incidence of side effects low,” and claimed a 96% success rate. They failed, however, to mention the emergence of a new disease affecting some of the subjects<sup>x, xi, xii</sup>.

With a government/pharma track record such as these, coupled with the covid vaccine death count & injury numbers, why would ANYONE want to roll the dice on a medical experiment and risk their health for a virus with a 99% recovery rate?

In 1976 government leaders may have had a conscience, as the swine flu program was halted in 9 states due to 3 deaths, yes THREE...three individuals who died after receiving swine flu shots<sup>xiii</sup>.

Yet, today more than 12,000 Americans have died as a result of the Covid vaccination and our state continues to bribe and pressure its citizens with promotional gimmicks. Private businesses are now pressuring employees with no job, no job. Compulsory universal vaccination is an attempt to exert control over every citizen. It is an infringement to our God-given liberties and in direct violation of Title VII of the Civil Rights Act of 1964<sup>xiv</sup>.

Like many in our state, I am a person of faith, and believe that my body is the temple of the Holy Spirit. It is my sincerely held religious beliefs which prohibit me from certain medical procedures and products. It is my faith, and my knowledge of God's love and his word that prohibit me from taking many of the "Government Recommended" vaccines.

Perhaps you know, perhaps you don't, perhaps you don't even care, but it is well publicized that many, if not most, vaccines are made from the cell lines of aborted babies and/or animals. Fetal cell lines are cells that grow in a laboratory. They descend from cells taken from elective abortions in the 1970s & 1980s.

Both the Pfizer & Moderna vaccine use the fetal cell line HEK 293 in the confirmation phase to ensure the vaccines work. HEK 293 cells are Human Embryonic Kidney cells derived from an aborted fetus tissue taken from a 1973 elective abortion that took place in the Netherlands. The Johnson & Johnson vaccine infects PER.C6 fetal cell lines cells which descend from tissue taken from a 1985 elective abortion<sup>xv, xvi</sup>.

Regardless if the cell lines are thousands of generations removed from the original fetal tissue, I cannot inject the fetal cells of a murdered baby into my body.

I believe individuals have the freedom to make their decisions based upon their own consciences and research. It is my God given right, as well as my constitutional right to make my own medical treatment choices.

Employers are crafting policies in violation of Title VII of the Civil Rights Act of 1964 that disfavor individuals because of their sincerely held religious beliefs. Employees should not have to choose between practicing their religion and keeping their jobs.

Due to the importance of HB 248, I strongly urge you to fast tract HB 248 and send the bill to the house floor for a vote. Ohio employees urgently need freedom of choice without fear of retribution or loss of employment.

Thank you for your time and consideration.

Angie King  
Celina, Ohio
