House Health Committee

RE: Amended Substitute Bill HB248

Dear Representative Lipps,

We need to ensure that HB248 is not only gets passed but is enforced! I am of mother of two, a COVID survivor and very pro-choice. Americans have and need the freedom to make their own choices! I have more healthy/natural immunity against COVID than any vaccine could give me, it is infuriating that the public (CDC, NIH, Doctors/Science) has totally disregarded NATURAL IMMUNITY. Has the science world totally forgotten all about Antiviral treatments that can vastly treat the symptoms of this illness? Vaccines don't NOT cure respiratory infections. Where is the real truth that people are dying of these vaccines? Where is the real science and truth that people's health is being permanently damaged by these vaccines? There is NO reason any child (or adult for that matter) should receive this unapproved vaccine. I have athletes as sons, the last thing we need to do is put unknown chemicals in their bodies that could protentional cause underlining heart health issues, brain bleeds and possible sterilization. There have been 863 serious adverse events (meaning death) in 12–17-year-olds in the last couple of months. The CDC has admitted that this "VIRUS" has **NOT** been isolated by a human or animal sample, the sample used to come up with this "VACCINE" was digitally generated which the vaccine was made from. This virus has NO unique symptoms, all the symptoms are related to other viruses and common colds.

This madness has got to stop! Stomping all over citizens constitutional rights has got to stop!

This the UNITED STATES of AMERICA, not China or Cuba.

Please stand up for the American public against this government over reach. We elected the politicians to speak for the public.

Sincere Thanks
