RE: Ohio House Bill 248: Vaccine Choice & Anti-Discrimination Act

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Julie Bentley, a life-long resident of Ohio. I lost my father and only surviving parent this past November. I believe the forced isolation and required nursing home protocols that were implemented due to COVID19 contributed to his death.

The vaccination issue has divided us when we as Ohioians and as Americans should stand united for freedom. Freedom includes the right to individually choose to elect or reject any medical procedure. I thank each of you on this committee and all who serve in a public capacity that have taken the oath of office to support the Constitution of the United States and the Constitution of Ohio.

Let me quote the Preamble to *The Constitution of the United States*.

*“We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.”*

Establish Justice. The experimental COVID19 vaccines have caused many people unnecessary harm including death according to the VAERS website and yet all vaccine manufactures have been granted clemency from those seeking retribution from such harm. Where is the Justice?

Insure Domestic Tranquility: The constant vaccine propaganda on TV promoting the vaccinations and shaming of the unvaccinated has created unprecedented anxiety and division amongst the people of this nation. We are experiencing anything but domestic tranquility.

Provide common defence: Thousands of infected illegal aliens are pouring into our country and being transported to cities throughout the country infecting our American citizens. An unbelievable act that is clearly not providing common defence.

Promote general Welfare: Forced isolation especially for the children has done anything but promote their general welfare. Teen suicides are up more than ever with many doctors indicating isolation as the potential cause when it is known that children have the lowest probability of contracting COVID19. Vaccinated individuals are now being called “super spreaders” and are now infecting others. All of the vaccine options do not even stop nor guarantee the possibility of enduring major side effects up to and including death.

Secure the Blessings of Liberty to ourselves and our Posterity: This refers to the preservation of the rights and freedom of every citizen. Each of you as members of the house were elected to ensure our rights and freedoms are safeguarded. This bill is certainly an opportunity to further secure our rights and freedoms.

I believe my father would have supported this bill should he have had the opportunity God rest his soul. I ask that this committee support and defend our Constitution and preserve the rights and freedom of each and every citizen by affirming your vote to support House Bill 248.

Sincerely,

Julie Bentley
