Karen Bearss
HB 248 (In favor of)
Chairman Scott Lipps
Health Committee

Dear Honorable Chairman Scott Lipps and Honorable members of the committee,

Thank you for allowing my testimony.

My name is Karen Bearss and I am in favor of HB 248. I believe that our Medical Freedom is one of our most sacred and critical choices that we deserve and should stay between ourselves and our doctor. There are many factors of why we should keep our body autonomy and it is extremely dangerous for those decisions to be made by our government or our employers. A vaccine is an intrusive medical procedure that has many dangerous risks and it should be our decision to have informed consent, weigh out the risks and benefits and then choose what's right for our situation. Vaccines are not 100 % safe or effective and we should be able to choose the ones we want or don't want. My fear is that once they get mandated, we'll be forever stuck in a very dangerous position of never getting this freedom back. My grandson was vaccine injured and now has a lifelong disability, so because of that it has put me in research mode for now 6 years. Vaccines are not a one size fits all and never will be! I would hope when you make your decisions you will read the science and not just the one-sided views that has taken domination in the media.

I beg you to approve this bill soon, because thousands of people are losing their jobs because employers are starting to mandate these vaccines. Many protests especially Healthcare workers, doctors and nurses are protesting against this vaccine. 500 showed up at Kettering Healthcare Network last week. You have to ask yourself what do they know, what have they seen? Doctors and scientists all over the world are testifying to the dangers of this vaccine, but they are not allowed on mainstream media and are not being heard. What happened to real science? Science is never settled and should be debated constantly, but only the monopolized big pharma who is absolutely compromised by having conflicts of interest, owning their own patents, making trillions of dollars off these vaccine with absolute immunity that cannot be sued or liable for the injuries, disabilities and deaths from their own products are allowed to be heard. How dangerous is that? So if we have to take the risks, we deserve the choice. Vaccine disabilities are

tragic, depressing, life changing, terribly expensive and it destroys families, believe me I know!

Important points:

1) These vaccines are not working. Thousands of breakthrough cases (fully vaccinated people) are getting Covid and transmitting Covid. Dr Fauci and the CDC has admitted this and changed their guidelines that even the vaccinated should start wearing masks again. The CDC also stopped tracking breakthrough cases at the end of April. Why? Probably because it brings attention to the fact that these vaccines are no longer working and growing numbers are proving it and they don't want that known. So why should unvaccinated people want to get this vaccine and why should they be punished with losing their jobs, not being allowed to travel, restaurants, entertainment venues, etc. when the vaccinated are now being infected and transmitting the virus and are allowed to do everything? Please approve this bill to stop this.

2) The people who have already had Covid have longer and better immunity than the vaccinated and do NOT need a vaccine. Why aren't they testing for this? Over half of the world or more have already gotten Covid. So mandating this will be extremely dangerous to vaccinate those who already had Covid because of ADE (antibody-dependent enhancement). ADE modulates the immune response and can elicit sustained inflammation, lymphopenia, and/or cytokine storm, one or all of which have been documented in severe cases and deaths. ADE also requires prior exposure to similar antigenic epitopes, presumably circulating in local viruses, making it a possible explanation for the observed geographic limitation of severe cases and deaths.

Another study found that the people who have already had Covid have the ability to fight off the variants and in this study, they found 23 variants. These vaccines are not protecting us from the variants as you've heard about the Delta lately. The vaccine injuries and deaths from the vaccines and breakthrough cases are growing by the thousands weekly. A whistleblower with access to the data is testifying under oath in a lawsuit in progress said that the numbers of deaths are around 45,000 now in the US.

3) Many scientists have warned against mass vaccination during a pandemic and said all virologist knows this. It causes such pressure for the original virus to live that it will mutate. They warned that it will cause the variants and had they not mass vaccinated the virus would have ran it's course and we would be done by now. As you see this is exactly what's happening. Another reason to pass HB 248 and stop these mandates.

4) There ARE proven treatments, such as Ivermectin and Hydroxychloroquine protocols, Budesonide and more that hundreds of doctors have testified about saving thousands of patients lives with these protocols. With EARLY treatment no one had to die. I think you know why Dr Fauci and CDC are not approving them, because they are heavily vested in the production of vaccines and vaccine passports.

5)The last and maybe the most important point is NO ONE knows what these vaccines will cause down the road. It's already caused immediate deaths and injuries such as, blood clots thrombocytopenia, Guillain-Barre(paralysis), stroke, myocarditis (heart inflammation), heart attacks, encephalitis, convulsions, seizures and more. Doctors and scientists are warning of future autoimmune and chronic diseases such as cancer, Parkinson's, MS, multiple organ and cardiac disease and death. What if in the next year this fast-tracked vaccine starts causing all of these things in great multitude? No one...no one can answer this because this technology is new and it has not been studied long enough to know. It usually takes 10 years to study vaccines. Why should anyone be forced to take this experimental new technology vaccine even if they approve it in September? You know mandates will hit even harder after approval. Why do people need to lose their jobs and lose their right to medical freedom especially when the vaccinated are still getting Covid and transmitting it? Please know they are never going to stop making more vaccines especially if they are mandated. They already have 250+ in the pipeline. I know they have an RSV(respiratory Syncytial virus) mRNA vaccine in trials now.

I will put some links below and I hope and beg you to read and research the science from other scientists that do not have any conflicts of interests or an agenda to vaccinate the world. This may be the most important bill you can pass to protect us.

Thank you for your consideration and this opportunity,

Karen Bearss
