Solon, OH 44139

Subject HB248

To Whom It May Concern:

I am writing to you as an American with ancestry in this country that goes back to the Revolutionary War and the Mayflower. I am a proud American and grandmother and am concerned about the health and warfare of my grandchildren.

It is essential that freedom of choice remains as the standard in this country! We are not a socialistic country contrary to the efforts of the present administration! Most average, hardworking Americans plan on keeping it that way. We need to get the corruption out of Washington D.C. and get rid of the people in the House, Senate, Governors and everyone else there with their heads up their posteriors!

We need to follow the constitution and keep our freedoms! Give the American people enough credit for being smart enough not to fall for the government's bs!

Sincerely,

Linda K. Hricik

Grandmother and Freedom Fighter
