

Dear Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee,

Thank you for the opportunity to provide proponent testimony on House Bill 248. My name is Marlene Quiggle. I am a Christian, a Mother, a Wife and a Nurse. I am against vaccine passports. I never in a million years thought that I would have to be writing this testimony as a citizen of the United States of America. Let me be very clear, we get our freedom from God and God alone. My body is the temple of the Holy Spirit and I will not take anything that I deem as poisonous into my body. I have faith in God and God alone. Follow the science they say. I say follow GOD! If everyone believed in God, put God first and had genuine love of thy neighbor we wouldn't even be in this boat. The world elites want to play God. They are not God but they will soon find out there is a God and every knee will bow.

We live in America, home of the brave. We cannot let these communists take over our country under the guise of a public health emergency. I am against vaccine passports because I believe this is just the prelude to the mark of the beast. COVID -19 is also treatable and has over a 99% recovery rate. Masking our children and forced vaccinations cause people to live in fear. Fear is not from God! Masks are ineffective and the world elites know this. Did you see the pictures of Obama's birthday party? What a joke! No masks! Let's not forget all of the non-vaccinated, non-mask wearing illegal immigrants pouring into our country. People need to wake up and see the big charade that's going on all over the world. As I write this letter the governor of Tennessee just signed an executive order that allows the National Guard and State Guard to implement quarantines and involuntary commitment of citizens "in connection with certain health care and emergency services operations. What is that? It reminds me of concentration camps. We need to act now in order to protect Ohioans from these Nazi's.

Dr. Peter McCullough who is the most qualified physician on COVID-19 in the United States stated that the experimental "vaccine" must "be considered unsafe and unfit for human use." I believe Dr. McCullough who is an internist, cardiologist and epidemiologist over Anthony Fauci who doesn't even treat COVID -19 patients and most likely help create this plandemic in the first place. Americans are sick and tired of being played by the world's elites and if we allow vaccine passports in our great country than we just played into the hands of the enemy.

House Bill 248 will protect the rights of individuals to assume the responsibility for their own health. I sincerely hope each and every one of you vote yes on HB 248 in order to secure the rights of all Ohioans to choose whether or not they want this vaccine. Also, if this bill doesn't pass I will seriously consider selling our home and moving to Florida where they respect the rights of their citizens to choose their own health care.

God help us all!

Marlene Quiggle
