The scope of my testimony is to outline how inoculations, face masks, and digital immunity passports must be subject to autonomy of bodily integrity with out pernicious financial, social and professional segregation.

Regarding inoculations, it behooves all involved to be informed about their rights, not as citizens of a specific nation, but of their natural human rights endowed to them by their Creator, that no man can take from another, this would invariably include any medical interventions – inoculations being one of the more controversial and invasive. According to the Nuremberg Code of 1947, “The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.” Further, “During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.” In conjunction with the Nuremberg Code of 1947, there is the Civil Rights Act of 1964 that clearly states segregation for any reason is illegal. To reiterate, inoculations are "pharmaceutical medical interventions" that are both invasive and personal. Our bodies are our property, not the governments, not a corporations, therefore the adage of "my body, my choice" is applicable. Further, the specific inoculations that are being considered for mandate are experimental in nature and the companies manufacturing them have legal indemnity if their product causes bodily harm. The citizens of this city, county, state, and this country, are being subjected to an experiment, whose trials do not convene until the end of 2022 and beginning of 2023.

Regarding face masks, they are considered “non-pharmaceutical medical interventions” and their ability to stop any infectious disease is minuscule at best. Further, prolonged use of face masks can cause a myriad of health problems including oral thrush and bacterial pneumonia. It is illegal to mandate non-pharmaceutical medical interventions on anyone, especially children or those with medical exemptions. Wearing face masks should be optional and not imposed on individuals because others are scared. Like with inoculations, they are medical interventions and should be subject to personal choice and not force or coercion.

The final thing I wish to discuss are digital immunity passports. These passports are being facilitated by very powerful entities beyond the scope of local, state, and national jurisdictions. Digital immunity passports are more than about immunity; they are about complete control of not just Americans, but of humanity. Digital immunity passports are being being discussed in this country and are the beginning of a "pharmacological/bio-security state". They violate our privacy as well as the

Constitution. No government entity or private corporation should be able to have unfettered access to my personal health information. Further, for governments and corporations to exclude those of us who do not acquiesce to such demands is intolerable, and must be met with firm resistance. If these are made mandatory, there will be a central bank digital currency attached to them which will obliterate anonymity and usher us into a technocratic, bio-security state that goes beyond any dystopia that we could fathom.

As far as solutions? We as a community, as a state, as humans, need to not enforce face masks or inoculations. Local and state governments must stop taking money from the federal government that does not represent their constituents. If state local governments wish to maintain their sovereignty they must stop allowing private businesses to enforce draconian measures on their constituents. This is Fascism. This is intolerable. Your constituents will not beholden themselves to edicts that are not only unlawful but go against each living human's sovereignty. If you wish to discuss any of these things with myself and people like me, please reach out as we have copious amounts of legitimate information that can not only elucidate all of these points, but also give us a way out.
