

Dear Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Nancy Walling and I am an accountant. The reason I support House Bill 248 is because I am person with pre-existing conditions, I have to consider all effects of any medical treatment before I make the best choice for me personally. My doctor does not tell me what I need, she tells me what my options are and the risks of having a treatment and the risks of not having the treatment. I choose which risk I prefer. My doctor has not even told me she recommends for me to get the shot because it is EXPERIMENTAL. Nobody has the right to tell me I must get injected with it. God gave me the right to decide what happens to my body. Government must protect that right.

The Governor of OH has already over stepped what is lawful when he tyrannically required citizens to wear masks even after ALL OF THE SCIENCE proved they are not effective against respiratory viruses. We also know that those masks caused many assumed unintentional consequences, such as impairing children's emotional development and many children became sick with other illnesses as a result of wearing masks.

Consequences ALWAYS happen when government oversteps with sweeping mandates of any kind. When they involve the health of citizens, government MUST get out of the way. "My body, my choice" applies to this more than any other time that phrase has EVER been used.

This shot is EXPERIMENTAL and the Nuremburg trials outlawed mandating injections that have not been proven safe. THIS SHOT IS NOT PROVEN SAFE. It has UNKNOWN consequences. Please pass a law that respects Ohio citizens sovereignty.

Thank you for reading my testimony.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Nancy Walling
