Testimony - Members of the house, Rep Lispp, Committee members.

My name is Paige Stemen,

I've been in nursing for going on 20⁺ years. I come before you today, to testify in support of HB 248. I've come to this statehouse many times to voice our concerns on many issues, such as 2nd amendment, religious freedom, unconstitutional mandates, being issued by a complete, out of control administration. I've fought so hard, for so many years with some victories & some loses. Never in my entire life, would I've ever thought that I'd be having to come before a committee to beg & plea for a constitutional protected right to decide or decline a medication/vaccine, as to whether or not I'll be able to say NO to my or any employer that wants to mandate that we must vaccinate or be fired. I'm speaking on behalf of many, thousands of nurses who're protesting this ridiculous mandate, that is not law. I've worked through many flu seasons, some worse than Covid.

Never before have we had to mask & wear goggles, we all lived. We lived through Covid last year, many 98⁺% lived, some of us did get Covid & we lived! We didn't have a vaccine last year & we lived! Yes, we lost some, not millions. Worldwide Flu causes 3 to 5 million severe illnesses and any where between 290,000 - 650,000 deaths. Now, let's talk about the vaccine. A VAER's whistleblower that we now have 45,000 people who have allegedly died from the Covid vaccine within 3 days, which has sparked a lawsuit against the federal government, by Thomas Lenz an attorney here in Ohio, Let's talk about why 15 thousand + nurses are protesting against these mandatory vaccines. Could it be because, many have seen hundreds of people coming into our hospitals due to adverse reactions from vaccine, or have had fellow co-workers die hours after being vaccinated, or have had co-workers stroke out, or suffer very devastating side effects, some life long & will never be the same. Some of us have

Aug. 20, 2021 3:50PM
have seen many people, take the vaccine & within 24-48 hours
positive for Covid-19. Then there's the many pregnant women who
were told to take the vaccine & went into pre term labor & lost
their babies. We are being mandated, yet the very own CDC
employees don't have to take the vaccine, why is that? Why is
it we've been bribed, offered gift cards, pizza parties, 5 million
dollar lottery by our own Governor, some employees who did
vaccinate weren't even qualified to enter. More than all this
we've done our research, we know who has funded & made these
vaccines. We do not trust big pharmaceutical companies who
Pfizer who just agreed to pay \$15 million dollars to resolve
an investigation of Foreign Corrupt Practices Act violators

You can look this up Pfizer corruption into any search
engine, particular duck duck go. Our own Justice Dept
Announces health care Fraud, the largest health care fraud
from Pfizer & have agreed to pay \$ 2.3 billion the largest
health care fraud settlement in the entire history of the entire
Department of Justice arising from the illegal promotion of
"certain" pharmaceutical products. They've also admitted
to Bribery in 8 countries!!! Illegal marketing etc etc.
What comes to us (medical community) eventually works it's
way around & may end up being mandated to elected officials
next. Do you want to be forced/mandated to take a vaccine
from big pharma that's cause more damage & injury to children &
adults alike, from companies with these types of track records?!!!
seriously??!! We must not, comply & we will not comply, but
more than anything we need to triumph & win this battle. ~~we~~
The risks & lives so costs are too high. This vaccine is a russian
roulette. Please do not fail us now. The nurses & everyone in this
medical community are counting on all of you to come through for
us on this. For one day, you, any of you may just be in
our hospital or care facility. With that. I have a letter from one
of my patients, given to me on my birthday. Please, vote yes
don't have him lose me & fight for us by voting yes on HB 264

Thanks Paige Stemen
