

My name is Rachel Freier and I am a Medical Laboratory Scientist. The reason I support House Bill 248 is because the COVID-19 vaccine is human experimentation. We have never tried an mRNA vaccine on humans on such an extreme basis, such as entire populations before, and we do not know the long term affects that this could have on humans, such as five plus years in the future. This is a brand new experiment and most vaccines take up to ten years to be fully proven safe and effective (John's Hopkins). It is inappropriate to ask us to participate in this human experimentation project and I WILL NOT be a part of it any further. This will not go on.

You are here to represent the people and uphold our constitutional rights as American citizens. It says in the Ohio Constitution, "All men are, by nature, free and independent, and have certain inalienable rights, among which are those of enjoying and defending life and liberty, acquiring, possessing, and protecting property, and seeking and obtaining happiness and safety". This experiment is not safe by any means. Dr. Robert Malone, who holds the patent on mRNA and is termed the father of mRNA, has said himself that there is not enough data regarding mRNA vaccination use in humans. This is unacceptable and will not be tolerated. Again, we will not be part of this human experimentation.

You took an oath to uphold our constitutional rights. Again, in the Ohio Constitution it states, "All political power is inherent in the people. Government is instituted for their equal protection and benefit, and they have the right to alter, reform, or abolish the same, whenever they may deem it necessary; and no special privileges or immunities shall ever be granted, that may not be altered, revoked, or repealed by the General Assembly". This means that if you do not uphold our rights to be protected and benefit, in all senses of both words, then we the people can and WILL recall you.

We have freedom to choose what we allow in our bodies and what we don't. We have to come together to stop this now before it goes any further.

I am also constantly hearing at my place of employment that “you are not vaccinated so you are the problem”. This is also not scientifically supported. If others are vaccinated and fully immune, then the unvaccinated individuals wouldn't be affected by the vaccinated or vice versa. However, this is not the case, because unvaccinated and vaccinated individuals can still contract the disease (CDC). We the people, as American citizens, have the freedom of choice and the right to obtain and maintain our health and safety. It seems to me that choosing not to get this vaccination goes hand in hand with both of those rights. Also, those individuals that already had COVID now have long term immunity and don't require vaccination. That is factual and scientific evidence because our body has immunologic memory (NIH). Many of the viruses and infections we've already had, we have lifelong immunity to. This means that when you get sick, your body can fight off the infection more readily, due to already having fought it off the first time. The body can go straight to making more of the antibodies that helped you get over it, to get over it even faster the second time. That's why we have vaccines. This mRNA variant of a shot is no vaccine. It is a health risk and is more appropriately labeled as genetic therapy than anything else.

Furthermore, we are being labeled as anti-vaccination. This is also NOT true! People in healthcare are not stupid. We are not anti-vaccination. I work in lab, and the science that comes from what we do, is how many vaccinations were created, tested, and where individuals are tested for immunity. Vaccinations were created initially for all the right reasons, to help people fight off infection more successfully. These types of vaccinations are still being used today, but they do NOT consist of this experimental type that we've never used successfully on entire populations or even worldwide before. It is a huge health risk to us all!

Now, currently as of 8/5/2021, my employer, Dayton Children's Hospital is now supporting and enforcing a vaccine mandate. If we do not comply by October 1st, then we will be placed on unpaid leave and then terminated on October 31st. We already worked during the

pandemic and we have the freedom of choice as American citizens and the right to personal safety.

If you do not support House Bill 248, you are making us choose between feeding and supporting our families, or a job and lifelong health problems. If you do not support House Bill 248, we the people will make sure you are recalled.

Something needs to be done about this NOW. We are running out of time. We will be heard about this and you need to be our voice. Support House Bill 248 with everything you have, or everything we all have will start dwindling away, including our rights and freedom. This is about more than a vaccine. It's about our freedom, right to safety and to make our own choices. Thank you for your time. I sincerely hope that you acknowledge this and take the time to consider what is really at stake here. I am urgently asking you to fully support House Bill 248.
