

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Sonia Wilson, and I absolutely am in favor of this bill. There are several reasons I support House Bill 248; personal freedoms have been ignored during this “pandemic”. We were told to lock down for 15 days by DeWine and that turned into months. Business and families suffered. During this timeframe, independent doctors across the country tried to save lives. There were protocols identified. Lives were being saved and those doctors and treatments were ignored. This didn’t fit the narrative of Big Pharma, Social Media, and Federal Agencies – CDC, NIH and WH. Pushing the Covid-19 Experimental Jab was their only solution. This is WRONG. Now several different mutations of Covid-19 have been identified and those that are vaccinated are at risk. There are thousands of deaths related to the “vaccine” and data has been hidden or suppressed.

I have a genetic mutation that was identified several years ago. The news was a shock, I refuse to adhere to any “mandate” that will affect MY BODY. My personal health is NOT regulated by the government and is not up for public debate or interference. This Jab is an EXPERIMENT and anyone that agrees to this jab should be informed. Which is also not happening. After researching and reading several different papers from independent doctors and media sources, it is clear that there are options for treatment and there are serious side effects of the “vaccine”. The inventor of the messenger RNA vaccine platform, Dr. Robert Malone was “black listed” due to his concerns when he voiced them on a podcast.

It is my understanding that The Fourth Amendment of the U.S. Constitution states, “The right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated.” Title III of the U.S. Civil Rights Act prohibits discrimination based on medical condition in private businesses such as grocery stores, banks, restaurants, hotels, retail stores and all public facilities including schools. It seems outrageous that any government agency or private business would not understand the rights I have as a citizen. Unvaccinated people are not the enemy, the virus was created, and the bottom line is that each person should make their own choice.

Again, MY BODY MY CHOICE!!!!

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,
Sonia A. Wilson
