Re: House Bill 248

To: Scott Lipps

Good Afternoon! I would like to go over some reasons why I am a Proponent of House Bill 248. My husband & I have 3 children - a daughter who is 14, and two boys ages 12 & 9. It is critical to me and my family that this bill passes. I am very concerned about the personal stories I have heard about young women having miscarriages after receiving the COVID vaccine. My personal friend delivered a still born baby just weeks after having the COVID vaccine. Additionally I have a cousin who's son has been vaccine injured. He is the same age as my son and is non verbal. My children currently attend public school and play sports - both club & for the school. I do not wish to give my children the COVID vaccine. My daughter has allergies to several medications and I am concerned about a lethal reaction to this vaccine ~~and~~ both now and in her future as a hopeful mom someday. It is absolutely vital to me & many other families in Ohio that House Bill 248 gets passed. I do not want my children to face discrimination because we are choosing NOT to vaccinate. Please I implore you to do whatever is necessary to get this bill passed!!!

Sincerely,

A very concerned parent - Jeffery Norman
