

In favor of this bill passing due to the restrictions put on the citizens of Ohio by Governor Mike Dewine. My reason I'm in favor of it is my dad was in the hospital not covid related & no one was allowed to see him. Due to this he became very depressed & he basically gave up. The time he got out of the hospital his body was so wore out due to him not being treated adequately at the hospital due to according to the hospitals own admission that so much attention was put on Covid patients. He was never able to recover due to his body being so run down both physically & emotionally that he passed away on December 14th, 2020. Mike Dewine has put so much attention on Covid that it seems like all the healthcare system seems to care about in the state is covid patients & the rest of the people not suffering from covid related illnesses are left to not being treated correctly.
