**RE: Senate Bill 22 - Establish legislative oversight over Governor's and health orders**

Chairwoman Roegner, Vice Chairman McColley, Ranking Member Craig, and members of the Government Oversight and Reform Committee: Thank you for allowing me to sponsor testimony for SB-22.

Dear Legislators,

As a part of Ohioans fighting for our rights and involved with several very large organizations such as Ohio Stands Up! and Ohioans for Traditional Education, we need new members of the House and Senate along with members just reelected to understand that Ohioans are fed up.

It is time to put control back to the people, as well as with our House and Senate, as expected under our Ohio Constitution and our United States Constitution.

To start, we need you to stand up to the tyrant behavior that continues with our Governor, the Ohio Department of Health and Ohio Department of Education in the matters regarding shut downs, curfews, masks, and so many other "mandates" left unchecked currently in Ohio.

We, the people, just voted you into office. It is your oath to help carry my voice in these matters. It is time to take care of business unlike the last legislature, that even with a majority, let their constituents' businesses shut down, children's suicides skyrocket, mental and physical health decline with denied access to medical, medicine and services which continues today with "limited" capacity rules while big corporate America profits and censors us.

We need to promptly bring SB 22 out of committee to a vote and send to the House for approval.

This is a must. We cannot ever again let Ohioans be held hostage and encourage fascism. There is absolutely no disputing we are in, and have been led into fascism for the last 10 months. This is not America. Thank you to the members already co-sponsoring this bill!

Let's start with the easiest decision of your life. Children need to be in school full-time 5 days a week without major restrictions now, not in March after Biden's 100 days. We have over 30 studies now that show clear evidence, that children ARE NOT affected the way older adults are in how they get it, if they get and how they spread it. Our children need to see faces of their teachers, of their peers and need to play tag and football on the playground. They need to walk and talk with friends in the halls at school and in the cafeteria. They need to play instruments. My child is only allowed to "finger" their instrument that I pay monthly for to lease, and there is no singing allowed in music class. These simple little events contribute to social and emotional growth needed to mature in the K-12 environment. It is NOT the social distancing or masks keeping these COVID numbers low. It is them, their born DNA. When we start to actually discuss science and not politics, this is blatantly clear. It should be one's choice and no other way! Look at Idaho, look at Florida. How much longer are we going to punish our future of America? I know for a fact; my children will NEVER forget the people who are not standing up for them now when they turn 18 and can vote. Give our children their lives back right now.

The following German survey is being conducted and the authors have the intention to turn it into a peer reviewed study. The statistics alone are telling of what damage we are doing to our children. Stop the madness.

<https://co-ki-masken.de/en/current-survey/>

"By 26.10.2020 the registry had been used by 20,353 people. In this publication we report the results from the parents, who entered data on a total of 25,930 children. The average wearing time of the mask was 270 minutes per day. Impairments caused by wearing the mask were reported by 68% of the parents. These included irritability (60%), headache (53%), difficulty concentrating (50%), less happiness (49%), reluctance to go to school/kindergarten (44%), malaise (42%) impaired learning

(38%) and drowsiness or fatigue (37%)."

Let's also address masking and quarantining the healthy which has NEVER in the history of America been done before, and they continue to insist it works when in fact, over 90 percent of the USA has some form of mask mandate where over 88 percent of the population follows it and we still have CASES everywhere. Every single chart you review, will show you when and where masks were implemented and infection rates still went up. Clearly, politicians and even doctors believe Americans can't read data charts. But let's follow the science please. There is no one denying a new virus is going around the globe. What we are fighting for is the truth in data and how it is presented. The largest study done in the world on asymptomatic spread (Switzerland and France also did studies) finding the exact same evidence -

Let's discuss all the false positives we are generating! And now, after a year and Biden is in office, we should consider not only the result of the PCR test, the cycle threshold but having a doctor actually see the patient and their symptoms to provide an accurate diagnosis. This alone should ALARM you as a public official because any doctor willing to tell someone they have a confirmed case of anything without a medical examination is completely insane!

Lastly, let's address the vaccine issue and the "trending" fascism of being a restricted American if you choose to not take it. Ohio needs to set a precedent right now, and fast, that Medical Freedom MUST PERSIST. This virus has over a 99.8 percent survival rate and over 99.9 percent of severe cases are ages 65 and older. The VAERS CDC system is now reporting over 700 pages of adverse side effects of both the Pfizer and Moderna vaccines at all ages. You MUST work to protect the medical freedom of all Ohioans; set a national precedent and protect the rights of Ohioans to decide whether or not they take the vaccine, and prevent any societal repercussions if that decision is to not be vaccinated.

We are not waiting until Fall. Act now, support SB 22 and remove mandates, open businesses, open schools, take off the mask, and protect the vulnerable by offering the correct medical treatments and the vaccines to those who want them. It is their choice.

Thank you,  
Sincerely  
Cindy McBee
