

I am strongly urging you to vote YES on SB 22. Our governor and department of health has imposed overreaching power on the citizens of the state of Ohio. A state of emergency does not last a year. I believe that federal funding is keeping many states in a state of emergency as well as those in charge not wanting to give up their authoritarian power. Sars-cov-2 is acting like a typical respiratory virus. It has been mutating and may be more contagious but lot less lethal. There are also therapeudics to treat if given early. The fear imposed by our governor has created a hostile environment in our state. This fear is based on false science that "we" can stop a virus from spreading as well as the misrepresentation of the actual data from the Ohio Coronavirus Website. My family and I have been emotionally affected by the mandates and restrictions placed on our community. If this does not end now, I am afraid of what could be imposed on us next.
