

My name is Andrea Stem, I am a stay at home mom of three kids. I am basically a nobody, but I feel it my duty to write in and tell you what is happening in the real world with real people. It seems to us “real people” that those of you in power don’t care about us. We have been living a life of hell for a year now and no one seems to care.

My kids hate school, not like the usual way kids used to hate school. No, they really hate it and here is why.

My 16 year old daughter begs to not go to school because she feels isolated from all of her friends. At lunch, only 3 kids per table but they must be 12 feet apart. How are you supposed to talk to people so far away from you? They can see each other but don’t dare have any form of human contact that might get you sick from a disease that is 99.96% survivable.

My 13 year old son is forced to be in the same room, with no windows for most of his classes, including lunch! It’s pretty much like prison with the exception that prisoners have more freedom than these school children.

You were doing irreversible damage to these children! History will judge you for the decisions you made on behalf of these kids.

These dumb masks that are forced upon us are children are a form of abuse! They aren’t keeping anyone safe, and you it. What they are doing is taking away our unalienable constitutional right to breath fresh air. The rules of these dumb things are absurd! Example: No one believes for one second that wearing a mask inside a restaurant for 10 feet before you get to your table is keeping anyone from getting sick. Give me a break! They are forced upon us just to see if we will comply. You know it and so do we! If Dewine didn’t make us wear these mouth covers we would forget so be scared of a disease, isn’t as deadly as he would have is to believe. Then he couldn’t be the all powerful governor that he enjoys being. It is a scare tactic!

How about each individual person/family decide for themselves what they want to wear and how they want to handle their lives and leave the government out of it! You were never elected to tell us how to live, or get so involved with our lives. You were elected to speak for us, we the people, now DO YOUR JOB and speak for us!! Enough, enough already, give us our lives back and let people make there own decisions! VOTE FOR BILL 22!

Sincerely,

Andrea Stem
