

Dear Legislators,

As a part of Ohioans fighting for our rights, we need new members of the House and Senate along with members just reelected to understand that Ohioans are fed up.

It is time to put control back to the people, as well as with our House and Senate, as expected under our Ohio Constitution and our United States Constitution.

To start, we need you to stand up to the tyrant behavior that continues with our Governor, the Ohio Department of Health and Ohio Department of Education in the matters regarding shut downs, curfews, masks, and so many other “mandates” left unchecked currently in Ohio. Lives are being destroyed and it's not a virus with a 99.6% survival rate. Suicides are up, mental health is getting worse, drug abuse and overdoses are up, jobs and livelihoods are lost, businesses shut down. All from skewed data that so-called experts are spewing repeatedly. The information from the sites provided by the State show a completely different picture from what they are telling us. Data experts and scientist have proven time and time again that this virus is no more deadly than the flu. Kids need to be in school with no restrictions. My oldest daughter missed out on all the memories of her Senior year and is now not getting not experience all college has to offer because of the ridiculous mandates. My youngest daughter was experiencing breathing problems from wearing a mask all day at school and is now home missing out on social interaction with her friends and teachers. Numerous studies have proven asymptomatic people, and kids, do not transmit the virus and that masks do NOTHING to stop a virus, the virus is so small it goes right through.

It's time to look rein in the amount of power these elected officials have over our lives when they are basing their talking points on worse case scenarios and not real data. We are all individually responsible for our own health and wellness. I don't need some government official meddling in my healthcare.

I'm asking you to support SB22 and remove mandates, open businesses, open schools, take off the mask, and protect the vulnerable by offering the correct, proven medical treatments.

Thank you,
Sincerely,
Rochelle Walters
