

May 18, 2021

Greetings Sen. Huffman,

Please see the testimony below regarding Senate bill 58- Esther's Law:

I support this bill as it is crucial in being proactive to assist loved ones in nursing homes at all times, especially in a pandemic. I have a love one in a long term care facility and being able to have a camera in the room would be an extra layer of comfort. This would give me the ability as the legal representative the assurance that the needs are being meet and that I have the ability to act quickly if there's an issue that takes place with the staff or my love one. One of the most frustrating things during this season of pandemic is not being able to be there for my love one and not being able to have needs meet right away.

Respectfully,

Phorfina Wade
