

Delaware Police Department

Unsolved hit-skip vehicle from 2-24-21.

 **Delaware County, OHIO, Sheriff's Office**  
February 17 at 4:38 PM · 

We need your help identifying the suspect of a purse theft that occurred on Dec. 30th at the GetGo gas station on Columbus Pike in Lewis Center. The alleged suspect driving the black Kia Forte pulls up beside the burgundy Nissan (in the top left of video) and snatches the purse from the passenger seat before quickly fleeing the scene. If you have any information regarding the suspect's identity or whereabouts, please contact Detective Bessinger at jbessinger@co.delaware.oh.us...

Hello Everyone -

On February 18th around 11:00PM, an unknown subject forced entry into a storage outbuilding at 861 Tallmadge Road Suite K and removed tools. We are seeking assistance in identifying the subject. The pick up truck is a red Chevy, with black in color flared out fenders, and there appears to be a toolbox in the rear bed. If anyone has any information regarding this vehicle/subject, please click on "Submit a Tip" at brimfieldpolice.com or contact Det. Kelly Ryb... See More

Brimfield Twp P.D.: We had a great surveillance camera view of the suspect vehicle in this B&E incident. Unfortunately, the lack of a front license plate on the vehicle did not allow us to identify it. Incidentally, this same vehicle was involved in another B&E incident just yesterday (3-4-21).

From the Avon Police Department:

Although, I do not have a specific case to mention I can tell you that over the last 4 years the Avon Local School District has made an investment in equipping every school bus with forward facing camera's in an attempt to be proactive in helping us enforce school bus violations within our community. As I write this today, the district has 38 school buses equipped with the external forward facing camera's. By removing the front license plates from vehicles in Ohio, the Legislatures have made it even harder to ID school bus red light violators. I would guess this very situation has impacted many communities and school districts in Ohio.

Of course the district could once again spend more money to have these camera's turned around or have a second rear-facing camera installed, but why? They made the investment early on and now it may have been all for not. Apparently the way vehicles look in Ohio is a much greater concern in our state than the safety of our children.

Just my experience in Avon, Ohio.

Have a great weekend !

Larry M. Fischbach III
Captain | Avon Police Department

From the West Chester Police Dept.

Chief,

I just wanted to voice my strong support for the reinstatement for the requirement for a front license plate. Too many times officers are responding to calls where partial letters or numbers are given with only a color of a vehicle for a description. There is no way an officer can respond safely if they are expected to try to turn around and read (almost impossible) a rear plate of a passing motor vehicle.
