To Whom It May Concern

I am writing to you today to strongly encourage your support for the Kennebec Referendum HB 401 and SB 234.

My husband's family has owned & farmed property in Historic Hunt's Corners, Lyme Township for 172 years. My husband & I also own homes in Hunt Corners that will be impacted by the proposed industrial wind turbines of a mere 650ft if allowed to be erected in this beautiful rural residential area. We as property owners should have a say/vote on such a project that impact our lives & living conditions. If this project was to go through we would possibly be looking out our back door up to 7 industrial wind turbines standing a mere 650ft. we need to have our voices heard. A small minority of farmers and industrial wind companies should not be deciding what happens to this countryside... An industrial park!

Please give property owners the right to decide what impacts their lives & living conditions with the wind project within their own townships.

Please vote yes in support of the Kennebec Referendum & give voters power and a say in our personal property rights.
Sincerely, Donna & Brian
