Dear *Ohio Senators*

We are writing this letter to you to ask you to support SB 234.

We live in Richmond Township in Huron County. We built our home in 1986 and truly enjoy the peaceful, quiet rural life and the dark, quiet nights. We said no to the wind company and do not have a good neighbor agreement or a lease. We will be in the project boundary for Emerson Creek Wind Farm and Seneca Wind. We will be in the cumulative view shed of Republic Wind.

We are opposed to these industrial wind turbines and wind generation facilities for many reasons. We have concerns with the noise, infrasound, and shadow flicker. A decrease in the value of our property is also of concern to us.

We don't want to have shadow flicker coming in the windows while preparing the evening meal; then after eating have the shadow flicker while working outside. We don't want to be sitting on the ~~back~~ deck and hear the noise from the turbines. We don't want to have our sleep impaired by red flashing lights, noise and infrasound. We don't want our health affected by lack of sleep, infrasound, and noise.

We have attended township and commissioner meetings; all they can do is say no to the PILOT. We have written to state and federal representatives and senators. Chris has written to the Governor. We have talked with the OPSB. It seems that we have no control or local vote and that is wrong.

Please vote for SB 234 as it has been proposed by Senator Rob McColley..
