

“Local media is reporting that Dewine is planning to shutdown Ohio businesses again, for 4-6 weeks! The state of Ohio has been devastated by these ridiculous lockdowns and mandates with no scientific backing! The governor has kept information from the people of Ohio and pushed fear mongering. He has lost several law suits already and will lose more. The people of Ohio should not have to waste their time and money fighting these unconstitutional and illegal shutdowns. You and the other representatives should be doing your jobs and working for the people of Ohio and not playing political games! Hospitals are not overwhelmed. I am in and out of hospitals and nursing homes daily. What is overwhelmed is our elderly. I have talked to many who know this is bullshit. I have prayed with some and listened to some cry while talking about not being able to see family. They understand the risk and are willing to take that risk to hug the ones they love. The life expectancy in the US is 78. Most deaths suspected of covid are 81 and older according to the Ohio health department. Most of these people are going to die of other issues anyway. Must they die alone because some tyrant is on a power kick? They have a right to make their own decisions. This needs to stop and our legislators need to get off their asses and do their jobs!!”
