

I am happy to see the proposed change in fee for Plug-In Electric Vehicles. I recently bought a Tesla Model 3 and paid a registration fee of \$200.

I typically drive 8000 miles each year, which means I paid a gas tax of \$114 on my previous gasoline-powered car that got 27 MPG.

While I am happy to pay for the upkeep of our roads, I'd like to pay a more reasonable fee.
