

Dear

Senator Steve Wilson:
- Chairman,

I think you should pass
both HB 401 and SB 234.

- one: local voices should be heard
before letting large scale wind farms
come into and ruin our community.

- two: setback requirement should
be at least the minimum of the
manufacturer's recommended required
for safety, this is almost especially
close to schools where our children
and grandchildren go to school.

- three: large scale wind farms
will change our living conditions in
the Area we live.

Please vote to pass these bills
to support our local community
and the people who live here.

The same people who voted for
you to look out for us.

Thanks You:

Donovan Roth
