

Testimony to Repeal HB6

I was against HB6 from the beginning, as I do not believe it is environmentally sound to continue to back nuclear power. I do not want to contribute my own money to help bail out a failing, polluting industry. After the announcement of the extreme corruption linked to HB6, it seems ridiculous that this issue is still being considered. Again, I was against it before I knew about the corruption, and now it is a doubly terrible idea for Ohio. We need to think about the long-term health and financial prosperity of Ohio (and the nation) and not just then next 5-10 years. I do not believe saving this nuclear plant is worth the damage to the environment or the cost to Ohioans, many of whom are already struggling to make ends meet in the current pandemic.

Sincerely,

Elizabeth McGinnis
