

James Linscott-Hill

## **HB 6 Testimony**

Starting in January, House Bill 6 will require ratepayers to pay approximately \$1 billion over the course of six years for subsidies that First Energy had sought for two Ohio nuclear plants. In doing so all three branches of our state government said they would put a corporation that makes over \$14 billion in revenue over Ohio's citizens, by bailing them out. First Energy also Company A in the Larry Householder 60-million-dollar bribery scandal is further proof, everyday Ohioans are not thought of in the halls of the statehouse. The bill should also had been immediately repealed upon evidence of Householders misdeeds to push his own selfish political and financial interests. The Ohio House of Representatives with many other bought and paid for First Energy politicians then, dragged its' feet to ensure it would go into effect sneaking past the repeal deadline. In order to restore public confidence, and to set the record straight that the people of Ohio and its legislators are not for sale, HB 6 must be repealed. I will leave you with one final thought, Ohioans have bailed out Big Banks and Big Energy, when does our government start to work for us?
