Susan Manchester, Chair  
Ohio House Families, Aging and Human Services Committee  
Ohio House of Representatives  
77 South High Street  
Columbus, Ohio 43215

Dear Chairwoman Manchester, Vice Chair Cutrona and Ranking Member Denson,

My name is Corinne Lehmann, and I am a practicing Adolescent Medicine Specialist at Cincinnati Children's Hospital and the University of Cincinnati. I have over twenty-five years' experience in caring for patients and am currently licensed to practice in Ohio.

The Ohio General Assembly should leave the practice of medicine to licensed healthcare providers. I am gravely concerned that HB454 sets a dangerous precedent by interfering with medical decision making and parent/caregiver autonomy to discuss care options in consultation with their child's medical provider.

As I practice medicine, I perform a thorough evaluation on each patient and make treatment recommendations based on the best available evidence for that individual's situation. In my experience, parents/caregivers do the best they can, often in difficult circumstances, to make decisions they believe are in their child's best interest. I treat patients and families affected by HIV infection. Together we sometimes make complex decisions on treatment when a child or young person is not tolerating their medication. Patients and families affected by cancer often make similar treatment decisions with their providers regarding chemotherapy and surgery.

HB454 would place medical professionals in an ethical dilemma: we would have to refrain from providing evidence-based care to patients struggling with a diagnosis of gender dysphoria or lose our medical license. **I cannot imagine another diagnosis where a state law would prohibit us from delivering evidence-based care. I cannot imagine discussing all options in care with a patient or family.**

In a time when the demand for child and adolescent mental health care is at its highest, HB454 makes the demand even higher. I address patients' mental health every day. When I see adults with HIV infection, I have seen the harm of ignoring gender dysphoria later in life. I was trained to treat the whole child and the whole adult; ignoring a child's mental health or a diagnosis like gender dysphoria is simply not responsible care.

I implore you to vote no on HB454. This bill sets a dangerous precedent.

Sincerely,

Corinne Lehmann, MD, MEd
