

Megan Groulx Proponent Testimony for H.B. 60 – 3/22/21

My position is that autism should be moved to the approved conditions list. Other states have added this condition to their lists and research has shown that medical cannabis has positive effects on not just autism, but also its co-occurring conditions. I am a mother of two sons and the wife of a husband who are all on the spectrum. The medications provided by doctors often come with consequences (side effects) and therapy options like ABA do not take into account the emotional needs of the child.
