

From March 2019 to May 2021, my student was bullied, harassed and intimidated by another student and her friends. Despite following the established District processes for years, the District refused to treat the situation appropriately. In looking for help, I discovered that the legislators who enacted ORC 3313.666 failed to address the enforcement of Districts following the requirements set forth in the law. This is a classic case of the fox guarding the henhouse....a District that wants to deny the existence of the behavior the legislators sought to eliminate has no oversight. Therefore, I am asking to put a process in place through ODE that is similar to their process to review concerns with Special Education that would give the students and families.
